LUMINARIES

Enter the World of Global
Business Professionals

Welcome

Dear Readers,

It is with great pride and excitement that we welcome you to this edition of **360 limitless luminaries**, your trusted companion in the world of business, leadership and innovation.

Business today is more than numbers and profits—it is about vision, resilience, creativity, and the courage to embrace change. Every entrepreneur, professional, and leader carries a story that not only inspires but also shapes the way industries evolve. At **360 limitless luminaries**, our mission is to bring those stories to life, offering perspectives that empower and insights that matter.

In this issue, we dive into a range of themes — from transformative leadership strategies and disruptive technologies to inspiring entrepreneurial journeys and global market trends. We shine a light on the thinkers and doers who are redefining business excellence and leading with purpose.

Our editorial team strives to deliver not just information, but inspiration. Whether you are a seasoned business leader, a budding entrepreneur, or an aspiring professional, we believe you will find valuable takeaways that spark ideas and drive action.

What makes this magazine truly special is not just the content we create, but the community we are building. Our readers, contributors, and partners together form a network of knowledge-sharers and changemakers who believe in growing together.

We extend our heartfelt gratitude to our contributors and supporters who make this journey possible. And to you, our readers — thank you for trusting us to be part of your business journey. Your feedback and engagement encourage us to raise the bar with every edition.

Here's to celebrating the spirit of business, today and always.

Happy Reading!

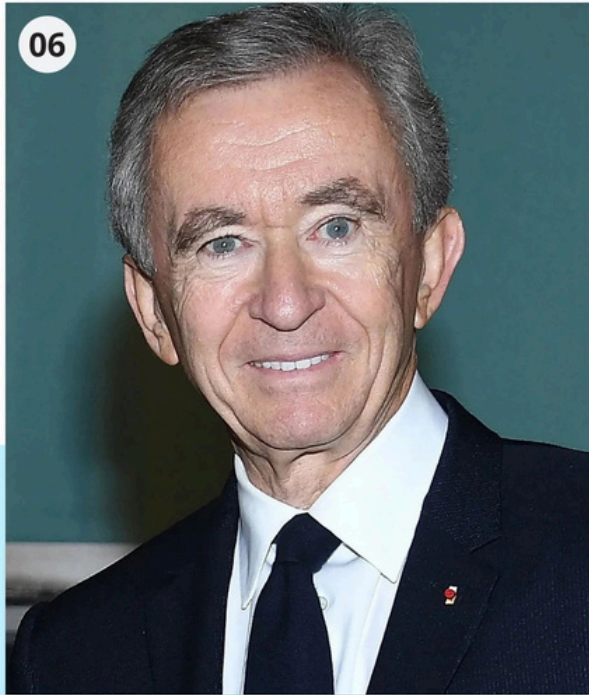

With warm regards,

G.Kadarkarai Pandian

French businessman Bernard Arnault

chairman and CEO of LVMH, and one of the wealthiest individuals in the world.

Early Life and Education

Bernard Jean Étienne Arnault was born on March 5, 1949, in Roubaix, France. He grew up in a devoutly Catholic household; his mother, Marie-Josèphe Savinel, was a pianist with a fascination for Dior, and his father, Jean Léon Arnault, was a civil engineering manufacturer who owned Ferret-Savinel. Arnault attended Catholic schools, including Lycée Maxence Van Der Meersch in Roubaix and Lycée Faidherbe in Lille, before studying civil engineering and mathematics at École Polytechnique, graduating in 1971. He also received classical piano training, reflecting his early interest in the arts.

Early Career

After graduation, Arnault joined his father's company, Ferret-Savinel, and became its president from 1978 to 1984. He persuaded his father to shift the company's focus from construction to real estate, selling the industrial division and renaming it Ferinel. The real estate branch was later sold to Compagnie Générale des Eaux, eventually becoming Nexity.

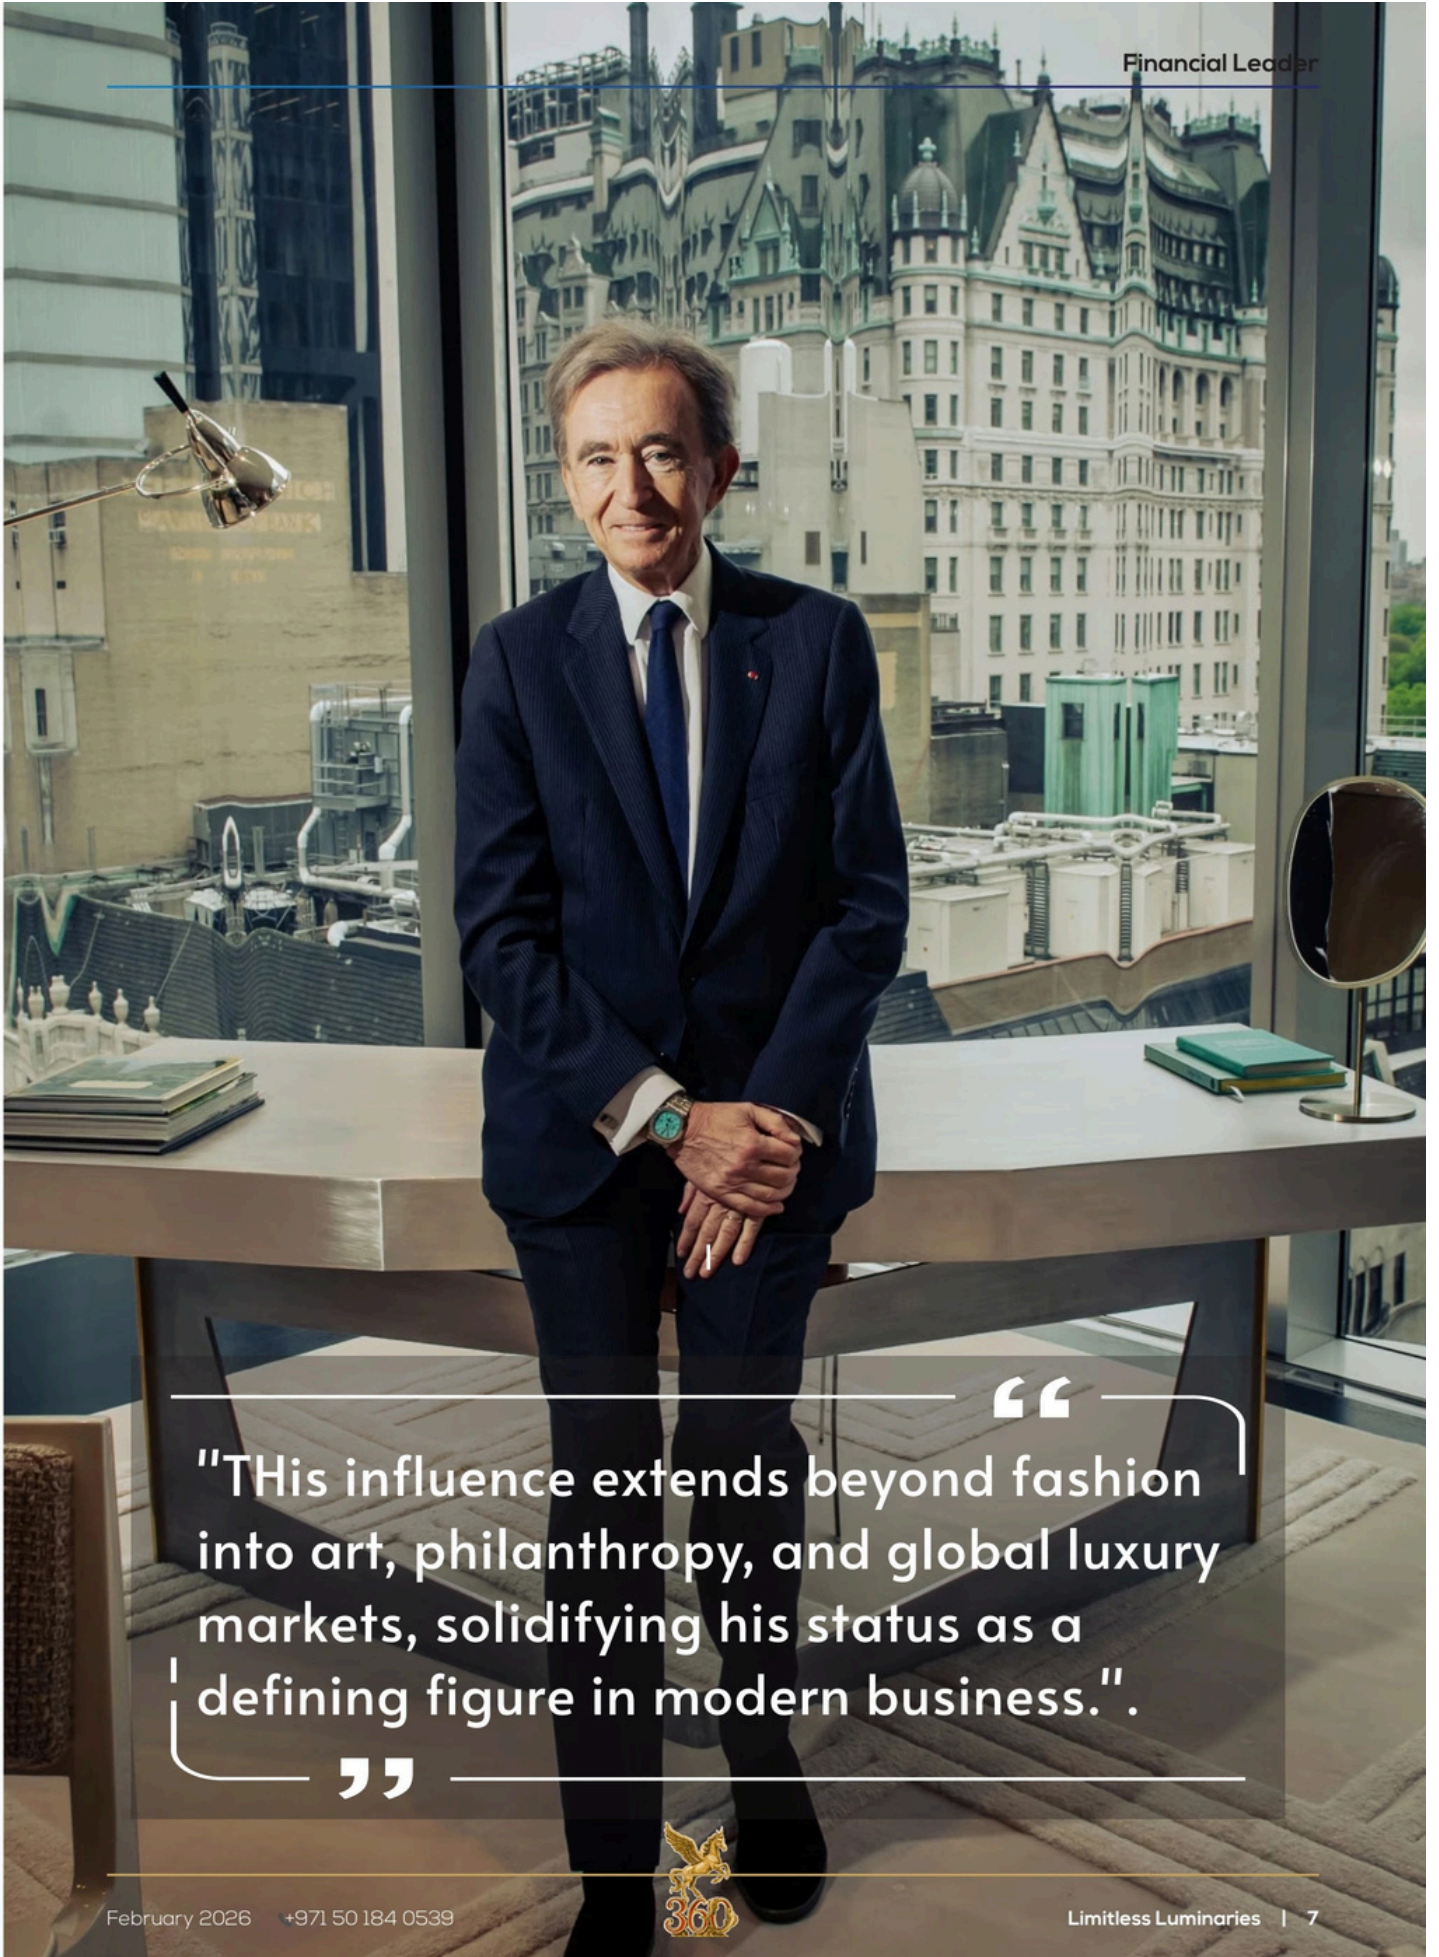

Entry into Luxury Industry

In 1984, Arnault acquired Financière Agache, a luxury goods company, and subsequently took control of Boussac Saint-Frères, a bankrupt textile conglomerate that owned Christian Dior. He sold most of Boussac's assets, retaining Dior and Le Bon Marché, earning the nickname "The Terminator" for his aggressive restructuring. By 1987, the company was profitable, generating \$112 million in earnings on \$1.9 billion in revenue.

LVMH and Expansion

Arnault co-founded LVMH (Louis Vuitton Moët Hennessy) in 1987, merging Louis Vuitton with Moët Hennessy. Through strategic acquisitions and investments, he became the majority shareholder and chairman by 1989, ousting

“This influence extends beyond fashion into art, philanthropy, and global luxury markets, solidifying his status as a defining figure in modern business.”

Financial Leader

former executives to consolidate control. Under his leadership, LVMH expanded to include over 75 luxury brands, such as Céline, Berluti, Kenzo, Guerlain, Loewe, Marc Jacobs, Sephora, Fendi, DKNY, Bulgari, and Tiffany & Co. He also developed the LVMH Tower in New York and invested in digital ventures like Netflix and Boo.com.

Personal Life

Arnault married Anne Dewavrin in 1978, with whom he had two children, Delphine and Antoine. After their divorce in 1990, he married H el ene Mercier, a Canadian concert pianist, in 1991, and they have three children: Alexandre, Fr ed eric, and Jean. All five children hold key positions within LVMH, ensuring family involvement in the business.

Philanthropy and Art

Arnault is a noted art collector, owning works by Picasso, Warhol, Henry Moore, and Yves Klein. He founded the Louis Vuitton Foundation, a contemporary art museum in Paris designed by Frank Gehry, and has contributed to cultural restoration projects, including a €200 million donation for the Notre-Dame Cathedral.

Net Worth and Recognition

As of 2025–2026, Arnault’s net worth is estimated between \$178 billion and \$203 billion, making him one of the richest people globally. He has received numerous honors, including the Grand Cross of the Legion of Honour (2023) and Commandeur des Arts et des Lettres. His leadership has made LVMH the largest company by market capitalization in the eurozone.

Legacy

Bernard Arnault is recognized for transforming LVMH into a global luxury powerhouse, combining strategic business acumen with a deep appreciation

for creativity and the arts. His influence extends beyond fashion into art, philanthropy, and global luxury markets, solidifying his status as a defining figure in modern business.

Indian-American business executive

Sundar Pichai

CEO at Google

Pichai Sundararajan (born June 10, 1972), better known as Sundar Pichai is an Indian-American business executive. He is the chief executive officer (CEO) of Alphabet Inc. and its subsidiary Google.

Pichai began his career as a materials engineer. Following a short stint at the management consulting firm McKinsey & Co., Pichai joined Google in 2004, where he led the product management and innovation efforts for a suite of Google's client software products, including Google Chrome and ChromeOS, as well as being largely responsible for Google Drive. In addition, he went on to oversee the development of other applications such as Gmail and Google Maps.

Pichai was selected to become the next CEO of Google on August 10, 2015, after previously being appointed chief product officer by then CEO Larry Page. On October 24, 2015, he stepped into the new position at the completion of the formation of Alphabet Inc., the new holding company for the Google company family. He was appointed to the Alphabet Board of Directors in 2017. As of May 2025, his net worth is estimated at US\$1.1 billion.

Early life and education

Pichai was born on June 10, 1972 in Madurai, Tamil Nadu, to a Tamil Hindu family. His mother, Lakshmi, was a stenographer, and his father, Regunatha Pichai, was an electrical engineer at GEC, the British conglomerate.

Pichai completed schooling in Jawahar Vidyalaya Senior Secondary School in Ashok Nagar, Chennai and completed the Class XII from Vana

Vani school at IIT Madras. He earned a B.Tech in metallurgical engineering from IIT Kharagpur. He holds an MS from Stanford University in materials science and engineering and an MBA from the Wharton School of the University of Pennsylvania, where he was named a Siebel Scholar and a Palmer Scholar, respectively.

Career

Pichai speaking at the 2015 Mobile World Congress

Pichai worked in engineering and product management at Applied Materials and in management consulting at McKinsey & Company. Pichai joined Google in 2004, where he led the product management and innovation efforts for a suite of Google's client software products, including Google Chrome and ChromeOS, as well as being largely responsible for Google Drive. He went on to oversee the development of other applications such as Gmail and Google Maps. On November 19, 2009, Pichai gave a demonstration of ChromeOS; the Chromebook was released for trial and testing in 2011, and released to the public in 2012. On May 20, 2010, he announced the open-sourcing of the new video codec VP8 by Google and introduced the new video format, WebM. Pichai served on Jive Software's board of directors from April 2011 to July 2013.

On March 13, 2013, Pichai added Android to the list of Google products that he oversaw. Android was formerly managed by Andy Rubin. Pichai was selected to become the next CEO of Google on August 10, 2015, after previously being appointed Product Chief by CEO, Larry Page. On October

Visionary Leader

“To fight over disruptive issues or debate politics”, and warned against using the company “as a personal platform”.

24, 2015, he stepped into the new position at the completion of the formation of Alphabet Inc., the new holding company for the Google company family.

Pichai had been suggested as a contender for Microsoft's CEO in 2014, a position that was eventually given to Satya Nadella. In August 2017, Pichai drew publicity for firing a Google employee who wrote a ten-page manifesto criticizing the company's pro-diversity policies.

On December 11, 2018, Sundar Pichai was questioned by the United States House Judiciary Committee on a range of Google-related issues such as possible political bias on Google's platforms, the company's alleged plans for a "censored search app" in China, and its privacy practices.

In response, Pichai told the committee that Google employees cannot influence search results. He also stated that Google users can opt out of having their data collected and that "there are no current plans for a censored search engine" in China.

In December 2019, Pichai became the CEO of Alphabet Inc. His compensation from the company topped \$200 million in 2022, which many employees criticized in light of large scale layoffs that Google undertook in 2023.

In April 2024, after 28 Google employees were fired for protesting against Project Nimbus, Pichai stated that the office is not a place "to fight over disruptive issues or debate politics", and warned against using the company "as a personal platform".

Awards and recognition

Pichai was included in Time's annual list of the 100 most influential people in 2016 and 2020. He was also included in the Time 100 AI list in 2024. He was awarded the 2021 Asia Game Changer Award by the Asia Society.

In 2022, Pichai received the Padma Bhushan in the category of Trade and Industry from the Government of India, the country's third-highest civilian award.

Personal life

Pichai is married to Anjali Pichai (née Haryani) and has two children. Anjali is originally from Kota, India. They became close while studying together at IIT Kharagpur. His recreational interests include cricket and soccer. He lives in Los Altos Hills, California.

Indian billionaire businessman Sanjiv Bajaj

Chairman and managing director of Bajaj Finserv.

Sanjiv Bajaj (born 2 November 1969) is an Indian billionaire businessman who currently serves as the chairman and managing director of Bajaj Finserv.

Early life and education

Born into the Bajaj family, Sanjiv is the great-grandson of founder Jammnalal Bajaj and the younger son of Bajaj Group chairman Rahul Bajaj.

He completed his education at a Swiss missionaries-run Catholic convent school. He then pursued his mechanical engineering degree from the University of Pune, master's degree in manufacturing systems engineering from the University of Warwick, and his management degree from Harvard Business School.

His elder brother Rajiv Bajaj is also involved in the management of Bajaj companies. His younger sister, Sunaina Kejriwal, was the director of the Kamalnayan Bajaj Hall and Art Gallery, and died in October 2024, aged 53, after battling cancer for three years.

Career

Bajaj began his career in 1994 with Bajaj Auto. During his years at Bajaj Auto, he held various leadership roles in finance, legal, and international business functions within the organisation. He was credited with bringing American-style supply chain management to Bajaj Auto, using General Motors as a model. Currently, he serves as the non-executive director of Bajaj Auto.

After Bajaj Auto's demerger in 2007, Bajaj took charge as the managing director of Bajaj Finserv. Also, he took on additional roles like the chairman of Bajaj Allianz Life Insurance and Bajaj Allianz General Insurance, vice chairman of Bajaj Finance, and managing director of Bajaj Holdings & Investment Limited in 2012. Market analysts indicated in 2015 that Bajaj is shaping his company in a manner similar

Pacesetter

“He was credited with bringing American-style supply chain management to Bajaj Auto, using General Motors as a model”.

”

to GE Capital. In 2023, he led the launch of Bajaj Finserv Mutual Fund.

Bajaj was the deputy chairman of the Confederation of Indian Industry (CII) Western Region for 2018–19. He was also elected as the chairman of the CII Western Region for 2019–20. For 2020–21, he was elected as the vice president of CII. In June 2021, he got elected as the President Designate of CII for 2021–22. In May 2022, he took charge as the President of CII for 2022–23.

Currently, he is the chairman and managing director of Bajaj Finserv. He was reappointed as managing director for five years in May 2022.

As a part of the Confederation of Indian Industry's B20 India Secretariat, Bajaj was appointed as one of the B20 India participants,

a position in which he fulfilled a part of a group that led the business agenda during India's G-20 presidency.

Controversies

In January 2022, Bajaj and his company's higher management were threatened by a hacker for a possible cyber security attack on his group companies.

Personal life

Sanjiv is married to Shefali Bajaj and they have two kids.

The Visionary Behind Infosys

N.R. Narayana Murthy

Indian billionaire businessman

In this Indian name, the name Nagavara Ramarao is a patronymic, and the person should be referred to by the given name, Narayana Murthy.

Nagavara Ramarao Narayana Murthy (born 20 August 1946) is an Indian billionaire businessman. He is the founder of Infosys, and was the chairman, chief executive officer (CEO), president, and chief mentor of the company before retiring and becoming chairman emeritus. As of January 2025, his net worth was estimated at US\$5.0 billion, according to Forbes.

Murthy was born and raised in Sidlaghatta, Karnataka. He first worked at the Indian Institute of Management Ahmedabad, as chief systems programmer, and Patni Computer Systems in Pune, Maharashtra. He founded Infosys in 1981 and was the CEO from 1981 to 2002, as well as the chairman from 2002 to 2011. In 2011, he stepped down from the board and became the chairman emeritus. In June 2013, Murthy was appointed as the executive chairman for a period of five years.

Murthy has been listed among the 12 greatest entrepreneurs of our time by Fortune magazine. He has been described as the "father of the Indian IT sector" by Time magazine and CNBC for his contribution to outsourcing in India. In 2005, he co-chaired the World Economic Forum in Davos, Switzerland. Murthy has been honoured with the Padma Vibhushan and Padma Shri awards.

Murthy is the father-in-law of Rishi Sunak, who was Prime Minister of the United Kingdom from 2022 to 2024.

Early life and education

N. R. Narayana Murthy was born on 20 August 1946 in Sidlaghatta, a city in India's south-western state of Karnataka into a Kannada speaking middle-class Deshastha Madhva Brahmin family. After completing his school

Transformational Leader

May -June 2026 ☎ +971 50 184 0539

Limitless Luminaries | 25

Pacesetter

education, he went to the National Institute of Engineering and graduated in 1967 with a bachelor's degree in electrical engineering. In 1969 he received his master's degree from the Indian Institute of Technology Kanpur.

In 2007, Murthy received an honorary degree from Lancaster University.

Career

Murthy first worked as a research associate under a faculty at IIM Ahmedabad and then later as the chief systems programmer. There he worked on India's first time-sharing computer system and designed and implemented a BASIC interpreter for Electronics Corporation of India Limited. He started a company named Softronics. When that company failed after about a year and a half, he joined Patni Computer Systems in Pune.

Murthy mentions that being arrested and expelled for no good reason during the communist era 1974 in a border town near

the Yugoslav-Bulgarian border, turned him into a "compassionate capitalist" from a "confused leftist/communist". In 1981 he, with six software professionals, founded Infosys with an initial capital investment of Rs 10,000, which was provided by his wife Sudha Murthy. Murthy was the CEO of Infosys for 21 years from 1981 to 2002 and was succeeded by co-founder Nandan Nilekani. At Infosys he articulated, designed and implemented a global delivery model for IT services outsourcing from India. He was the chairman of the board from 2002 to 2006, after which he also became the chief mentor. In August 2011, he retired from the company, taking the title chairman emeritus.

Murthy with Narendra Modi in 2014

Murthy is an independent director on the corporate board of HSBC and has been a director on the boards of DBS Bank, Unilever, ICICI and NDTV. He is also a member of the advisory

boards and councils of several educational and philanthropic institutions, including Cornell University, INSEAD, ESSEC, Ford Foundation, the UN Foundation, the Indo-British Partnership, Asian Institute of Management, a trustee of the Infosys Prize, a trustee of the Institute for Advanced Study in Princeton, and as a trustee of the Rhodes Trust. He is also the Chairman of the Governing board of Public Health Foundation of India. He is on the Asia Pacific advisory board of British Telecommunications.

In June 2013, Murthy returned to Infosys as executive chairman and a director. In June 2014, he stood down as executive chairman, was non-executive chairman until October, when he became chairman emeritus.

Murthy is also on the strategic board which advises the national law firm, Cyril Amarchand Mangaldas, on strategic, policy and governance issues. He is a member of IESE's International Advisory Board (IAB).

In 2010, Murthy has made an investment in SKS Microfinance along with venture capitalist Vinod Khosla.

In 2016, Murthy participated in FXC as a Board Member.

In 2017, Murthy raised concerns over alleged corporate governance lapses at Infosys, however the company went on to deny these claims.

Views on working hours

In late 2023, a comment by Murthy suggesting that young people should work 70 hours a week to boost national productivity sparked a widespread public debate in India. A year later, in November 2024, he addressed the controversy, clarifying that the remark was a matter for "personal introspection" and not a mandate. He stated that while he worked more than 70 hours a week for over 40 years, it was a personal choice, adding, "Nobody can say you should do it."

A year later, he advocated for the 996 working hour system (9:00am to 9:00pm, six days a week) in India, alleging this contributed to China's rapid growth. These comments received widespread backlash given the detrimental effects on physical and mental health the 996 system is known to have, the fact that it was outlawed by the Chinese Supreme Court in 2021, and such overwork does not provide compensation.

Personal life

Murthy's wife Sudha is an educator, author, and philanthropist who has served as the chairperson of the non-profit Infosys Foundation. They have two children together: a son, Rohan, and a daughter, Akshata. From June 2013 to June 2014,

Rohan Murthy joined Infosys as an executive assistant to his father. He left Infosys to create his own company called Soroco in 2014. In 2009, Akshata married British-Indian Conservative politician Rishi Sunak, who served as Prime Minister of the United Kingdom from 2022 to 2024.

Ageless Body

Becoming Young from the Inside Out

We live in a world obsessed with looking young. From billion-dollar beauty industries to anti-aging supplements and aesthetic procedures, humanity is constantly chasing the image of youth. But *Ageless Body* asks a far deeper question:

What if you could become young, instead of merely trying to look young?

The book introduces a revolutionary yet simple truth that age is not just chronological. It is a symphony of three dimensions: calendar age, biological age, and mental age

While the calendar moves forward predictably, biological age can accelerate or reverse depending on how we nourish our cells, regulate stress, move our bodies, and shape our thoughts

Inside the body, aging begins silently in shortening telomeres, slowing mitochondria, rising inflammation, hormonal shifts, muscle loss, and emotional burden. Yet the authors emphasize a powerful message: aging is not punishment; it is feedback. Youth is not lost with time but it is lost with neglect, and it returns with attention

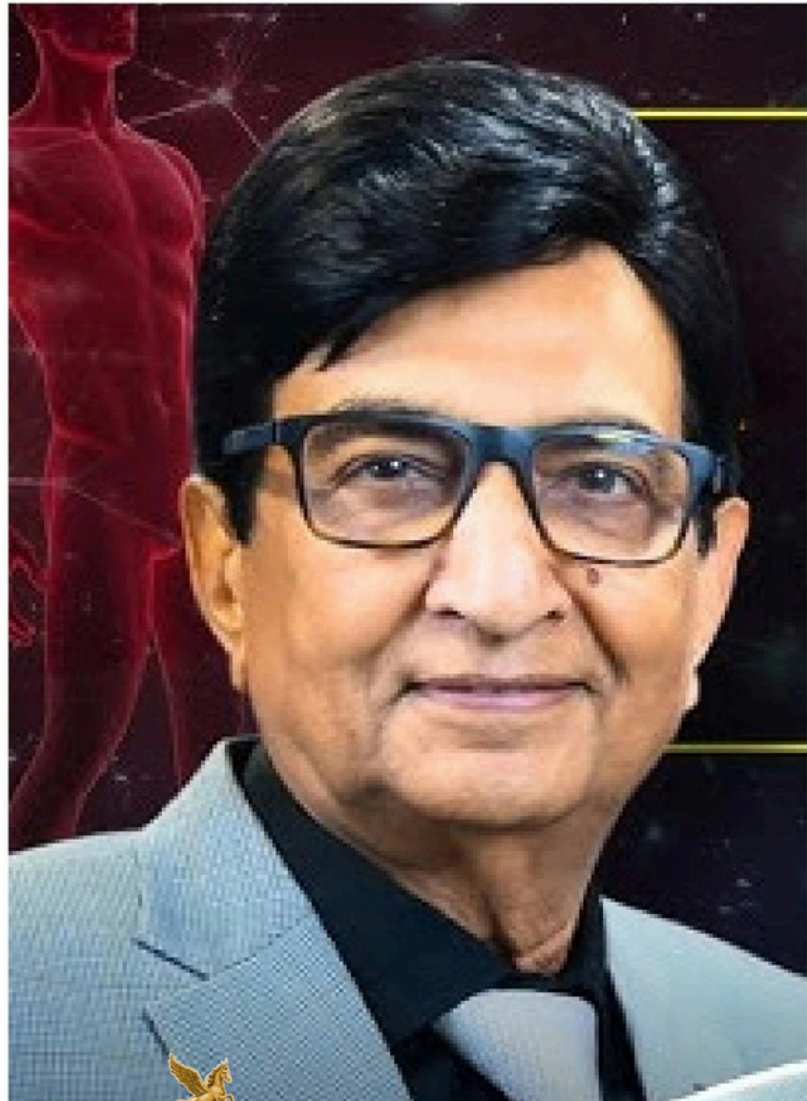

Beyond biology, the book dives into the hidden forces shaping our age and beliefs, subconscious patterns, emotional resilience, relationships, gratitude, meditation, and love. Thoughts influence genes.

Emotions influence hormones. Lifestyle influences longevity. This integration of neuroscience, epigenetics, preventive medicine, and inner mastery forms the heart of the Ageless philosophy

Ultimately, *Ageless Body* is an invitation not to deny age, but to master it. It reminds us that health is not a destination; it is a daily

design. When body, beliefs, and biology align, vitality becomes natural. And when individuals choose ageless living, the vision expands beyond the self to families, communities, and even an Ageless Nation

Agelessness, the authors affirm, is not about adding years to life; it is about adding life to years.

Respecting Moods Without Absorbing Them

By Sahasras Gee

Allow people to have their moods, and allow those moods to have nothing to do with you.”

I had read these words long back, and now, as I reflect on their truth and relevance in daily life, they have inspired me to write this article.

Every individual goes through different moods depending on circumstances, emotions, or even just the flow of the day. Sometimes they are cheerful,

sometimes withdrawn, and at times even irritable. Their mood is theirs, it reflects what they are experiencing within, not a reflection of us.

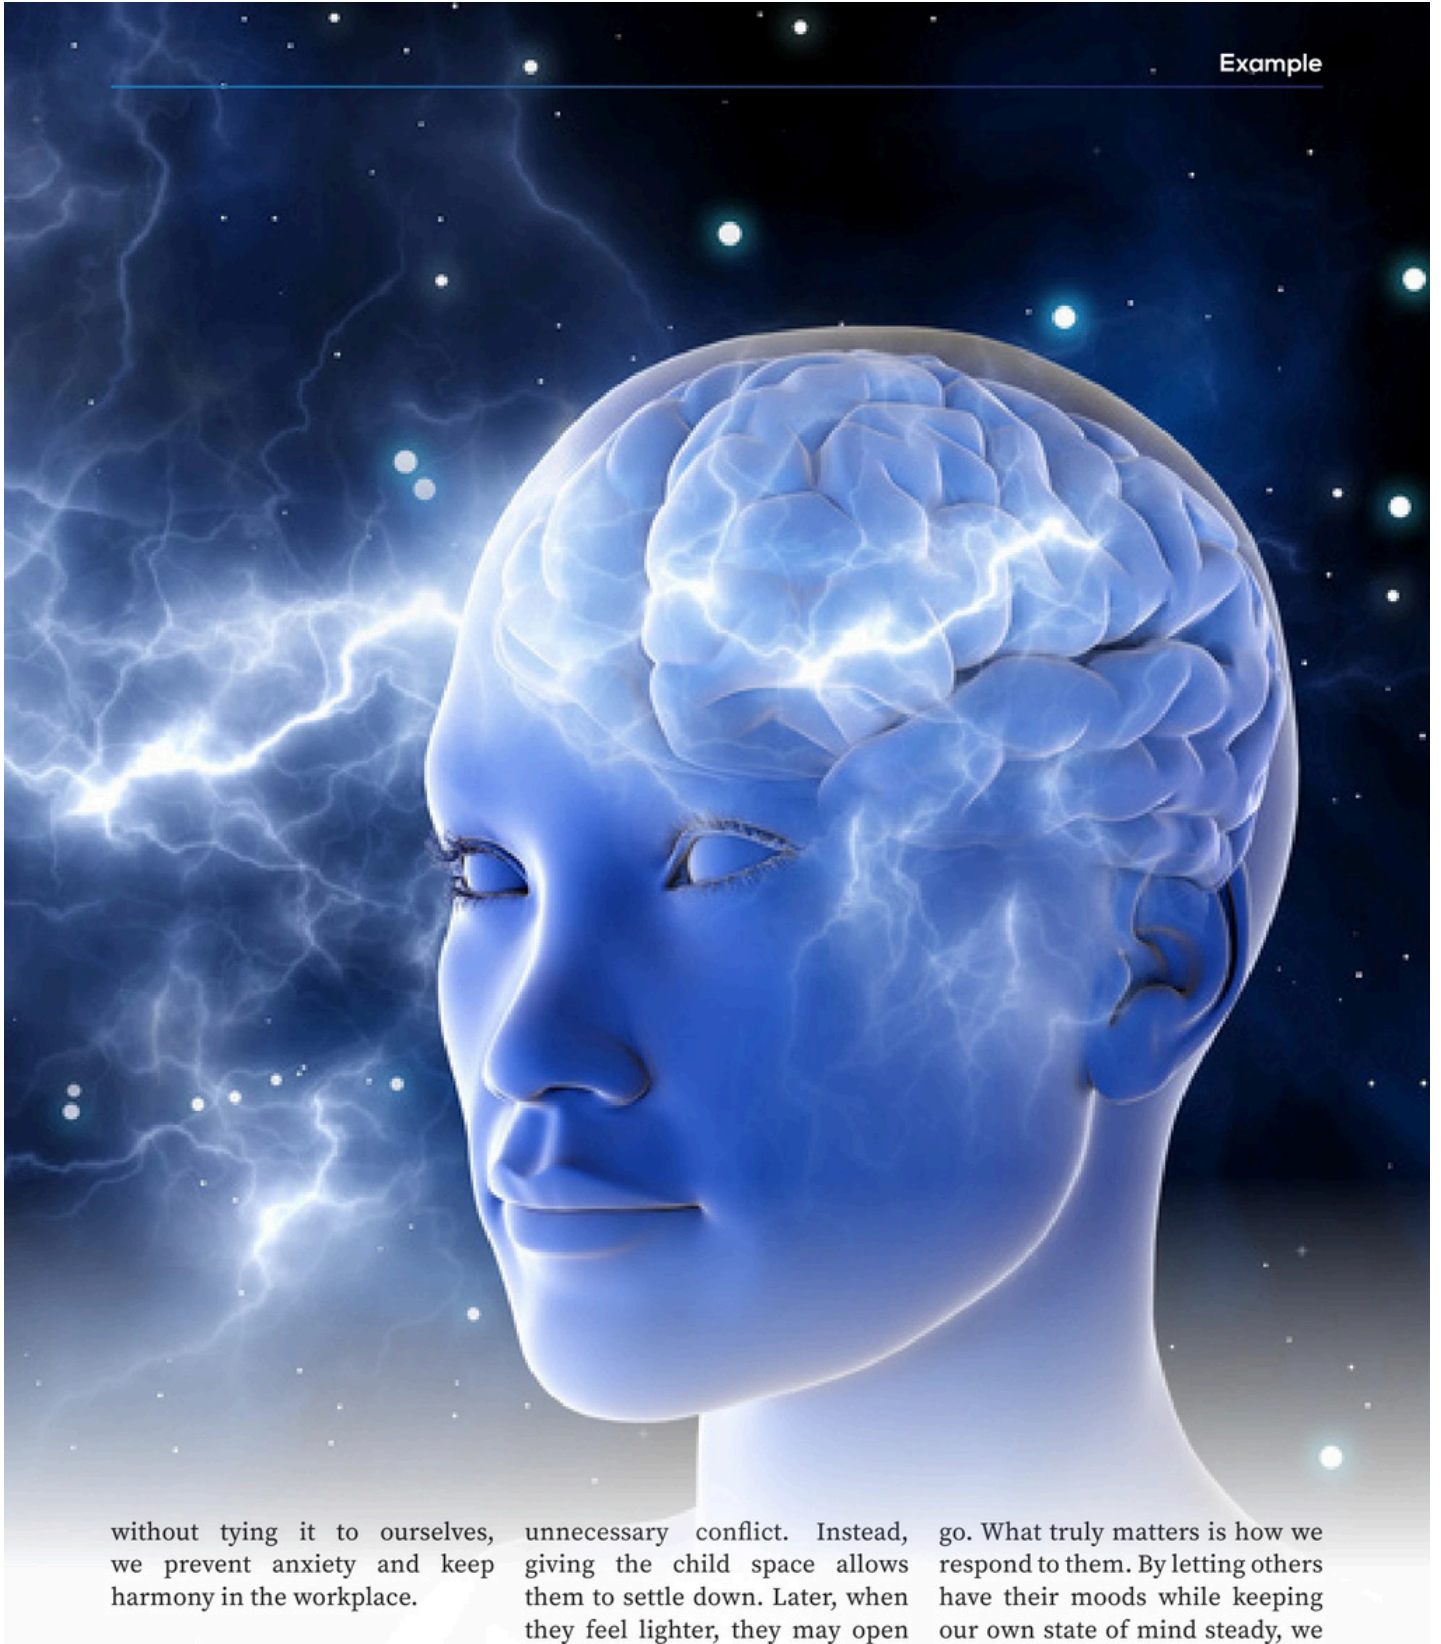

The problem arises when we start connecting their moods to ourselves. If someone is upset, we assume we are the cause. If someone is quiet, we feel ignored. This unnecessary personalisation creates stress. Instead, if we allow people to have their moods without letting them disturb our

own balance, we remain calm, empathetic, and emotionally strong.

Example 1: Workplace

Imagine a colleague enters the school looking serious and gives very short replies. The immediate thought might be, “Did I upset them?” But in reality, they might be having a problem with their lede partner, in-laws, with their own friends, or even with their child. By respecting their mood

without tying it to ourselves, we prevent anxiety and keep harmony in the workplace.

Example 2: Home

A child comes home irritated after a tough day at school. If a parent reacts immediately to their mood, it could lead to

unnecessary conflict. Instead, giving the child space allows them to settle down. Later, when they feel lighter, they may open up and share. This approach not only avoids arguments but also builds trust.

Friends, moods are like passing clouds, they come and

go. What truly matters is how we respond to them. By letting others have their moods while keeping our own state of mind steady, we choose peace over conflict and understanding over reaction. It is a simple yet powerful practice for healthier relationships and a calmer life.

Unlock Your Limitless Potential

As auditors, we often focus on numbers, but our true purpose is to empower individuals and organizations to reach new heights. At Limitless Luminaries, we believe everyone has untapped potential waiting to be unleashed.

Our Vision

We envision a world where everyone can achieve their goals and dreams. Our mission is to inspire, motivate, and support you in unlocking your limitless potential.

Are You Limitless?

Take our quiz to discover your inner strength and potential:

- Do you set ambitious goals and achieve them?
- Are you open to new experiences and challenges?
- Do you believe in your abilities and strengths?

Unlock Your Potential
Join our community of Limitless Luminaries and start your journey to success. Share your story, inspire others, and let's unlock our collective potential!

In This Issue

- Expert insights on overcoming self-doubt and achieving success
- Stories of limitless individuals who've achieved greatness
- Tips and strategies to unlock your full potential

வேண்டற்க வென்றிடனும் சூத்கை வென்றதூஉம் தூண்டற்பொன் மீன்வீழங்க அற்று.

Ventarka Vendritinum Soodhinai Vendradhooum Thoontirpon Meenvizhungi Atru

Transliteration

Don't gamble even if you win for it draws you in
Like fishes drawn to shining baits.

Hindi (हिन्दी)

चाह जुए की हो नहीं, यद्यपि जय स्वाधीन ।
जय भी तो कांटा सदृश, जसि नगिलता मीन ॥ (९३१)

Malay (Melayu)

Jangan-lah berjudi walau pun kamu
menang: kerana kemenangan- mu itu sa-
benar-nya ibarat mata kail berumpan yang
di-telan ikan.

— Ismail Hussein (Tirukkural)

Russian (Русский)

Не играй в кости, даже если тебе и
везет, ибо даже удача подобна крючку,
заглатываемому рыбой

Arabic (أبْرَعَال)

هيف رائف كنأ ولو رامقلا دوعتت ال
هغلتبي صش لشمك ال تسيل كتاحجن
(٩٣١) كحسل

French (Français)

Que l'on ait horreur du jeu de hasard,
même si l'on a l'habileté de gagner, car ce
gain ressemble à l'hameçon amorcé, qui est
dévoré par le poisson.

German (Deutsch)

Begehre nicht nach Glücksspiel,
selbst nicht, wenn du gewinnst - was du
gewinnst, ist wie der Fisch am Eisen des
Angelhakens.

Swedish (Svenska)

Åstunda ej hasardspel ens om du vinner.
Själva vinsten är lik den krok som fastnar i
fiskens gap.

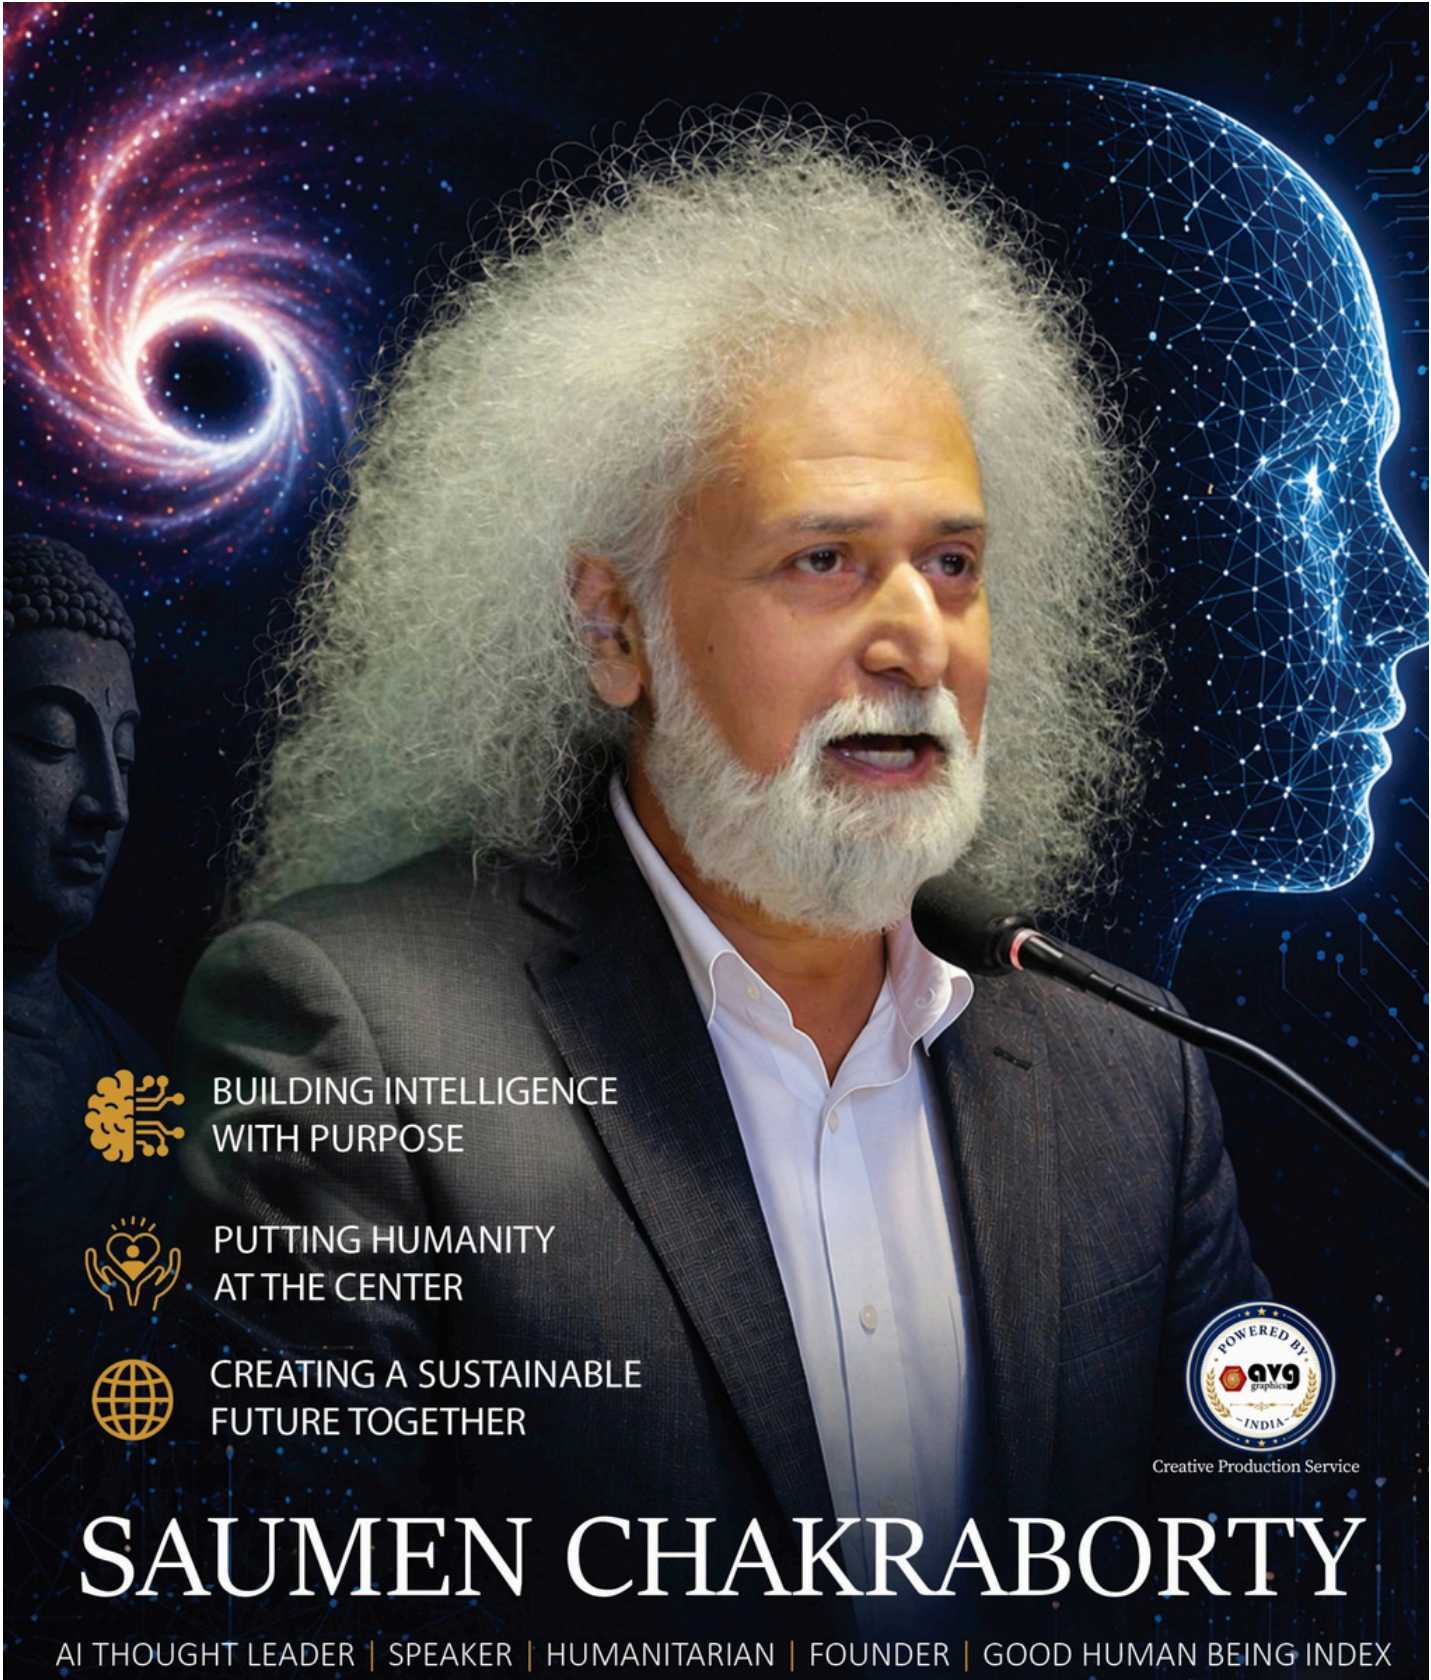

— Yngve Frykholm (Tirukkural)

Latin (Latīna)

Aleam, etiamsi vincas, noli appetere.
Vincere perinde est, ac si piscis ferrum
hami deglutiat. (CMXXXI)

Polish (Polski)

Nie graj nigdy, choć byłbyś na razie
wygrany, Bo los szczęścia to tylko przynęta.
